Supreme Court Decides Minnesota Rate Case, Holding Intrastate Charges Are Subject to Regulation By Commonwealth Authority.

CONFISCATION IS ONLY DEFENSE FOR RAILROADS

Transportation Companies Must Show Burden of Reduced Charges in Attacking the Commission Tariff—Congress Has Reserved Authority Only to Control the Rates in Interstate Traffic—Court Is Unanimous in the Decision.

Washington, June 9.—The power of the states to fix reasonable intrastate rates on interstate railroads until such time as congress shall choose to regulate rates, was upheld today by the supreme court of the United States in the Minnesota freight and passenger rate cases.

At the same time the court laid down far-reaching principles governing the valuation of railroad property for rate-making purposes, and according to these held that the state of Minnesota would confiscate the property of the Minneapolis & St. Louis Railroad company by its maximum freight and 2-cent passenger fare law. It enjoined the state from enforcing these laws as to this road for the present. In the case of the Northern Pacific and Great Northern, however, the court held that these roads had failed to show that the rates were "unreasonable" or confiscatory, and consequently reversed the United States district court for Minnesota, which had enjoined the enforcement of these laws as to these roads.

Buffalo, N. Y., June 9.—Distinction of the so-called Nubak trust was asked in a civil suit today by order of Attorney General McQuinn. The federal government seeks the dissolution by reorganization of the Nubak trust, which is alleged to be a trust of the Nubak family, which is alleged to be a trust of the Nubak family, which is alleged to be a trust of the Nubak family.

When J. W. Higgins stepped off the Katy train yesterday at noon he was at once in the embrace of his wife and daughter, and after that he walked and rode and spoke to the crowd of his friends and loyal supporters in his efforts to build here in Waco a great hotel.

St. Paul, Minn., June 9.—State officials and others connected with the long drawn out Minnesota rate case tonight were elated over the decision of the United States supreme court and were unanimous in declaring it a great victory for the state. As a result of the decision several railroads operating in Minnesota will have to pay into the state treasury approximately \$3,000,000 in the shape of overcharges.

Washington, June 9.—The power of the states to fix reasonable intrastate rates on interstate railroads until such time as congress shall choose to regulate rates, was upheld today by the supreme court of the United States in the Minnesota freight and passenger rate cases.

He next reached the conclusion that intrastate rates, whether on purely intrastate railroads or interstate railroads, had not been regarded by the courts as being a direct regulation of interstate commerce. He pointed to the regulation of rates on railroads in Illinois, and the Erie canal in New York, by the respective states concerned, to support his decision.

Justice Hughes said the railroad would have no ground to complain, if it were allowed a value for its lands equal to the fair average market value of similar lands in the vicinity, without additions by the use of multipliers or otherwise, to cover hypothetical outlays.

The supreme court today decided that the power of the states to fix reasonable intrastate rates on interstate railroads until such time as congress shall choose to regulate rates, was upheld today by the supreme court of the United States in the Minnesota freight and passenger rate cases.

GENERAL RAINFALL

FORT WORTH APPEARS TO BE
THE CENTER OF A ZONE
OF PRECIPITATION.

Light in Some Places, but Cloudbursts
at Others—Will Benefit Crops
in Texas.

Fort Worth, June 9.—Rains covering North Texas, from the Arkansas line west to New Mexico, and from the Red river south to Corsicana and southwest to San Angelo have fallen since Sunday forenoon. While the fall has been general in nature, in some localities it has been of almost cloud-burst proportions.

The Panhandle received only a light rain in general, but King county came in for more than two inches. San Angelo, the extreme southwest limit of the rain, was in a zone that received more than three inches of rain. Some damage to crops is reported from San Angelo and all of the small creeks were raised to flood stage. Along the Santa Fe and Frisco railroads from Fort Worth to Brady and San Angelo a general good rain has fallen and reports received at the local Frisco offices show that Menard was in the rain belt.

The rain has not gone into Texas

extensively. Paris reports a good rain over Lamar county and the Katy railroad accounts for a heavy rain extending from Fort Worth north to Red River. At some places the rain has been heavy enough to raise the creeks to a noticeable extent.

Grasshoppers Killed.
With the rain in the Panhandle the temperature dropped to 51 degrees. Sections that have been suffering from grasshoppers will be rid of the pest, as reports show that the storm has acted as an exterminator.

At Fort Worth up to noon Monday 1:52 inches of rain had been registered since 9 o'clock Sunday morning. The reports compiled at the local weather bureau show that Fort Worth is the center of the rain zone. The fall west of Fort Worth Sunday afternoon and night reached such proportions that the telegraph wires of the Texas and Pacific were crippled. In Tarrant county the rain was exceptionally heavy. At Brookhaven a heavy rain fell, but no damage was done.

Monday morning the rain began to drift south from Fort Worth and before noon Corsicana and Waxahachie came in for heavy showers. Local showers are falling in South Texas and at Kerrville and Hondo light rains fell, but in the eastern part of Medina county the rainfall was severe.

Heavy Along T. & P.
The rain was heavy from Fort Worth to Baird along the Texas and Pacific, drenching the counties of Parker, Palo Pinto, Hood, Erath, Eastland, Callahan, Stephens and Shackelford. From Baird the storm slackened and the rainfall went to Big Springs and light. Most of the counties west to Big Springs are yet cloudy and rain is threatening. From Fort Worth to Weatherford rain fell Monday morning in torrents, swelling dry creeks to flood stage.

With all of the rain but slight damage to crops has been reported. The watershed at San Angelo did slight damage to some fields, but the good will far offset the damage. The rains north of Fort Worth over the wheat belt have been beneficial, so grain men and farmers say. If the rain abates and the sun comes out immediately, the wheat in shocks will not be injured in the slightest. Standing grain has not been injured.

Grain men in Fort Worth, who have kept a close tab on the crop conditions, say that the rain has practically insured the corn crop. Rains have fallen at regular intervals since the corn was planted that have kept the crop growing all the time. The wet crop, which will exceed 31,000,000 bushels, has been saved.

Drothy conditions in Brown, Coleman and Runnels counties are reported to have done some damage to the grain crops, but the rains Sunday and Sunday night will more than overcome the drought damage. Brown county was thoroughly soaked and nearly an inch of rain was registered at Ballinger Sunday morning.

Fruits of all nature and vegetables have been greatly benefited.

In Three Counties.
Brady, June 9.—Good rain throughout McCullough, Menard and Mason counties fell for the past 24 hours.

Creeks and Tanks Full.
Cleburne, June 9.—This morning a regular old-time rain fell here, lasting about four hours. The creeks and tanks are full. The corn crop is assured.

Rain at Hondo.
Hondo, June 9.—A light rain fell here last night. Heavy precipitation occurred in the eastern part of Medina county.

Crops at Snyder Safe.
Snyder, June 9.—One-fifth of an inch of rain fell here Sunday and an inch and a half fell early this morning and is continuing to fall all over the county. Feed crops and cotton are considered safe. This is said to be the first good seasonable rain here in six years.

At Corsicana.
Corsicana, June 9.—A heavy rain fell here this morning.

TO LATE TO CLASSIFY.

OIL INTERESTS DENY AGREEMENT

DID NOT CONFINE SELLING TO A
SINGLE COMPANY, IS THE
EVIDENCE.

STANDARD CONTROL ALLEGED

State Seeking to Show That Trust
Officials Had Majority of the
Magnolia Stock.

Corsicana, Tex., June 9.—Attorneys for the state in the Texas ninety-nine million dollar contest and penalty oil suit today sought to show by R. R. Brown, vice president of the Magnolia Petroleum company, co-defendant with the Corsicana Refining company, predecessor of the Magnolia, had a selling agreement with the Waters-Pierce Oil company by which the latter sold all of the oil refined by the Navarro company. The state endeavored to prove that after the Waters-Pierce company, which was declared to be a subsidiary of the Standard Oil company, was ousted from Texas and the Navarro company adjudged a trust, the agreement was continued between the Waters-Pierce company, successor to the Waters-Pierce and the John Healey company, later reorganized as the Magnolia company.

This contention the defense denied strenuously, declaring their products went to whatever firm would buy them, and that there was not, as the state claimed, any attempt to make the sales exclusively through any branch of the Standard in Texas or any other state. In this connection it was brought out that the Magnolia Petroleum company lately had decided to enter the Oklahoma field, but it was prevented through the action of the state of Texas in filing the suit. A plan to extend the selling operation to Arkansas also had been formulated, Mr. Brown said, but had not been carried out.

"Didn't the Magnolia Petroleum company keep out of Oklahoma just as long as the Standard Oil company had a subsidiary operating in that state?" asked Assistant Attorney General C. A. Swenson.

"We did not," replied Mr. Brown. "There were reasons why we could not operate in Oklahoma and we decided to go there as soon as we were able."

Wherefore the Dissolution.
In relation to the dissolution of the Navarro Refining company and the Waters-Pierce Oil company as trusts under the laws of Texas, Mr. Brown declared that the Navarro Refining company had been dissolved as a trust because it maintained no selling agency while the Waters-Pierce company had been dissolved because it had no refinery. That the Navarro had been reorganized with a selling agency and that it is still being prosecuted as a trust.

The state's attorneys sought to draw from the witness that there now is warfare between the Pierce-Fordyce company and the Magnolia because the latter, when it organized its selling force, had taken all the Pierce-Fordyce most efficient men. The witness denied that his selling force had been recruited entirely from the other company.

Letter as to Pierce.
A letter from C. N. Payne of Titusville, Pa., to Mr. Brown, while the latter was at St. Louis, September 24, 1910, was introduced by the state to show the alleged connection of the Magnolia with the Waters-Pierce company. The letter said:

"I have your telegram of the 23rd stating you would see H. C. Pierce in St. Louis next Monday. I am very glad indeed you will have this interview and hope it will lead to the securing of his Texas distributing business. Of course, Mr. Folger has Pierce's estimate on the value of his Texas property on which Pierce bought 60 per cent. This will be a good guide for us on the valuation. However, no doubt he will say one was his own price and the other would be his selling price."

The state did not pursue the examination of the witness relative to the letter.

Testimony through which the state seeks to show that H. C. Folger, Jr., C. N. Payne, W. C. Teagle and other Standard Oil officials are interested in the Magnolia to the extent they tried to dictate selection of the board of trustees of the company also was developed during the afternoon, following the lead of the morning questions, but the defense contended that the eastern men were interested in the company as individuals and not as Standard officials.

There also was an effort to show that the company had not been organized pending the outcome of anti-trust legislation in the Texas legislature and it was brought out that Mr. Brown notified Mr. Payne when the special session of the legislature adjourned in 1910.

"Competitors were after us and we did not think it good business policy to go ahead with the organization at that time and change our company's name," the witness said.

Mr. Brown said that in 1909 he was

WOODHEAD TO LEAD

AD MAN FROM SAN FRANCISCO IS
TO BE THE PRESIDENT.

Toronto Will Get the Next Convention.
President Wilson Sends
a Greeting.

Baltimore, June 9.—Wm. Woodhead of San Francisco was assured of election as president; Toronto was decided on as the next place of meeting; several addresses were delivered and a message from President Wilson, brought by a courier from Washington, was read at today's session of the ninth annual convention of the Associated Advertising Clubs of America, which began here this morning. Herbert S. Houston of New York was nominated to oppose Mr. Woodhead for the presidency, but appeared personally before the convention and asked that his name be dropped. The election of the San Francisco man will take place tomorrow morning. Toronto was the only city proposed as the next meeting place. Nominations were ordered closed by unanimous vote after that city had been nominated and the convention's action was later ratified by the executive committee.

The message from President Wilson to President Coleman, of the association, was brought to the convention by Frank L. Ruth, one of the ten Marathon runners of the Baltimore Cross Country club. The start was made from the white house at 11:34 this morning and the finish line in the Fifth regiment armory was crossed at 4:10. The distance of a little over 40 miles was covered in four hours and forty-two minutes.

President Wilson's message was: "My Dear Mr. Coleman: Allow me to avail myself of this occasion of the great meeting of the Associated Advertising Clubs of America to send my warm greetings to the convention and to express my hope that your sessions may give a further impetus to the work of your organization. Your slogan 'Truth in Advertising' ought to win to you if lived up to, the support and admiration of the business community."

"Sincerely yours,"
"WOODROW WILSON."

Among those who made addresses at the afternoon sessions were Wm. Shaw of the Christian Endeavor World of Boston and James Kelley of the Chicago Tribune.

Mr. Shaw, who is also general secretary of the United Society of Christian Endeavor, discussed the problems and position of the religious press from the advertising standpoint.

A pageant, headed by Governor Goldsborough and Mayor Preston in carriages, in which many novel advertising devices were displayed, passed through the principal downtown streets tonight.

**Negro Attempts To
Assault Young Lady
On Her Way Home**

While on her way home last evening at 8:55 o'clock, a negro attempted an assault upon a young woman at South Third and Clay streets. Her screams frightened him away.

When she reported the affair to the police, the girl stated that the negro had followed her for some distance down the street. Reaching the intersection of South Third and Clay, he ran forward and caught her. Upon her screaming, he let her go and fled.

Police George M. Brainerd and Officer B. J. were detailed to apprehend the negro. At an early hour this morning they believed they located him, but delayed the arrest until after daylight.

sent to Corsicana from Ocala, N. Y., by H. C. Folger to assist J. B. Cullman in building a refinery. This plant was erected and after various changes of ownership became the Corsicana Refining company.

Attorney C. A. Swenson, for the state, opened the line of questions designed to bring out the connection of H. C. Folger, Jr., and C. N. Payne, Standard Oil men, with the Corsicana Refining company.

That H. C. Folger, Jr., and C. N. Payne, both of whom are recognized as Standard Oil men, actually owned 1,995 shares of the Navarro Refining company, but that the stock was held for them in the name of W. C. Proctor, was brought out. The state attempted to secure an admission that Folger and Payne held their stock under Proctor's name as trustees to avoid Standard Oil connections appearing in the records of the company, but so to this Brown said he did not know.

The main crux of the case, applied in the Security Oil company, the state claimed. The Security plant, Brown admitted, was owned by the London Trading and Investment company and the latter was the owner of the London firm to the English branch of the Standard Oil.

An Illinois inventor has brought out an asbestos lined wooden cigar that may be filled with tobacco and smoked by those who like to be reminded as members of cigars exclusively.

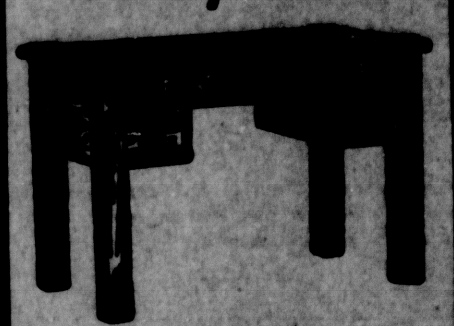

ENORMOUS

Is the only word with which to express the magnitude of our sale for the last day. In fact, we are compelled to select a few more specials in order to supply the wants of those who came too late to secure one of our specials for yesterday.

Let us impress it upon you that it will be necessary for you to come early, as the public in general seem to be quick to realize a bargain when they see one.

TO GIVE ACCOUNTING

CONGRESS INSISTS ON KNOWING HOW INDIAN FUNDS ARE SPENT.

Legislation is Proposed Which Will Affect the Pending McMurray Contracts.

Washington, June 9.—The senate Indian affairs committee today agreed upon an amendment to the Indian appropriation bill which would require a complete investigation of all expenditures of the Indian bureau; a detailed accounting for every cent spent of the \$10,000,000 or more to be appropriated for the coming year, and revolutionizing the method of administering Indian trust funds and annual appropriations in the future.

Another amendment agreed to by the committee prohibiting any contracts with Indians relating to tribal funds of the government unless authorized by the United States is expected to materially affect many contracts made with Cherokee and Chickasaw Indians by James F. McMurray of Oklahoma. It was asserted by Senator Ashurst before the senate "lobby" committee last week that McMurray's contracts, carrying a 10 per cent contingent fee, would have netted him \$3,500,000. Members of the committee were not certain tonight to what extent the contract would be affected.

The provision for a detailed accounting of all Indian funds is the result of persistent demands by members of the committee for information as to how the "hump sum" Indian funds were expended. Senator Lane of Oregon Saturday threatened to oppose the present bill unless such detailed information was produced.

A member of the President's economic

SEE TRACTORS WORK

COUNTY COMMISSIONERS WILL DETERMINE UPON BEST ROAD MACHINES.

Will Change Boqueville Road—Reimburses Property Owners—Make Road Inspection.

The county commissioners' court will spend next Monday witnessing a demonstration of tractor engines at Leroy. Arrangements have been made by several manufacturers of tractor engines and graders to have their machines at Leroy on that date, and the commissioners' court will witness a demonstration with the view of purchasing engine and graders for use on the roads of the county.

Since the visit of the court to Dallas some days ago, to witness a demonstration of an engine built by Austin Bros., a number of machine houses have been communicated with the court. Chas. R. Hine, representing the Texas Road Supply company of Wichita Falls, appeared before the court yesterday and explained the merits of an engine sold by his people.

Decision has practically been reached to purchase such an engine, although no official order to this effect has been passed.

The meeting of the commissioners' court yesterday was devoted principally to routine matters. County Judge George N. Denton, chairman of the board, was in Austin, and County Road Superintendent R. J. Windrow was in Bryan, therefore very few road matters of importance were taken up. The board passed upon the regular monthly bills, and entered a few minor orders.

It was decided to change the Boqueville road at a point near the Crawford store, which would result in straightening the road. Property owners at that point donated sufficient lands to straighten the road.

A report of the jury of view appointed to survey the proposed road from Prairie Chapel to the Valley Mills road was heard. This report recommended that the following property owners be reimbursed for damages because of the change in the road: Henry Englebrecht, \$85; H. Rabb, \$50; C. Matting, \$15; Wm. Rabb, \$35; C. Weiss, \$25, and August Dror, \$45.50, making a total of \$375.50.

The road, as proposed, will be a mile three quarters in length and will begin at a point east of the Prairie Chapel school house and run to the point where the Coryell City and Valley Mills road intersects. The report of the jury of view was not acted upon.

J. D. Douglas appeared before the board regarding proposed changes in the Boqueville road and the bridge over Wilson creek, near the city. He opposed the abandonment of the present road and bridge, which has been asked for. The commission visited the site yesterday afternoon, but took no action in the matter.

Boats To Parade

Inter coastal Canal Corpus to Galveston

Corpus Christi, June 9.—Following a band parade in the downtown business district of this city, starting at 6:30 o'clock, thirty-five Corpus Christi waterway boosters left the pavilion wharf this morning at 7 o'clock on their 350-mile call upon the newly completed inter-coastal canal to Galveston. The Corpus fleet was joined at 9 o'clock by the combined fleets of Port Aransas, Aransas Pass and Rockport, numbering seven boats, the start from that place being on schedule time.

It is expected that 300 boats will be in line Thursday morning when Galveston harbor is reached.

CONDITION OF CROPS

GOVERNMENT REPORT SHOWS PROGRESS OF GRAINS OF ALL KINDS.

High Average is Shown by Wheat and Oats and Barley Makes Excellent Showing.

Washington, June 9.—A bumper wheat crop, sufficient to mill more than 14,000,000 barrels of flour and which may reach the proportions of the record wheat harvest of 1901 if conditions from now on are exceptionally favorable, was forecast today by the department of agriculture in its June crop report.

Government experts estimated this year's harvest would be 744,000,000 bushels, of which 492,000,000 bushels will be winter wheat—a record for this crop—and 252,000,000 bushels spring wheat.

An increase of more than 1 per cent over last year's acreage was planted to oats this year, but the condition of this crop on June 1 was below the ten-year average, and officials estimate the production will be 1,104,000,000 bushels or more than 200,000,000 bushels below last year's harvest.

Some idea of the area of the grain crops of the country and of the prospective size of these crops, with the exception of corn, was given today when the department of agriculture at 2:15 p. m. issued its June crop report showing the condition of these grains on June 1, the acreage planted to each and estimates of the yield per acre and the total production, based on the ratio of the average condition on June 1 to the final yield in preceding years. These statistics were gathered from the many correspondents and agents of the department's bureau of statistics and compiled by the crop reporting board. Statistics for the various crops with comparisons for other years follow:

Spring Wheat—Area planted 18,482,600 acres, compared with 18,343,000 acres last year, 20,381,000 acres in 1911, and 18,352,000 acres in 1910. Condition 83.5 per cent of a normal, compared with 85.3 per cent last year and 82.8 per cent the ten-year average. Indicated yield 13.5 bushels per acre, compared with 17.2 bushels last year and 13.3 bushels the 1908-12 average. Estimated total production 252,000,000 bushels, compared with 330,348,000 bushels last year, 190,822,000 bushels in 1911, 200,575,000 bushels in 1910, and 245,000,000 in 1909.

Winter Wheat—Area planted 30,938,000 acres, compared with 26,571,000 acres last year, 23,162,000 acres in 1911 and 27,329,000 acres in 1910. Condition 82.5 per cent of a normal, compared with 91.9 per cent on May 1 this year, 74.3 per cent June 1 last year, and 80.7 per cent the ten-year average. Indicated yield 15.9 bushels per acre, compared with 15.1 bushels last year and 15.2 bushels the 1908-12 average. Estimated total production 492,000,000 bushels, compared with 430,556,000 bushels last year, 430,556,000 bushels in 1911, 424,162,000 bushels in 1910, and 418,000,000 bushels in 1909.

All Wheat—Area planted 49,420,600 acres, compared with 44,914,000 acres last year, 43,533,000 acres in 1911, and 45,681,000 acres in 1910. Condition 83.0 per cent of a normal, compared with 88.3 per cent last year and 86.1 per cent the ten-year average. Indicated yield 15.9 bushels per acre, compared with 15.9 bushels last year and 14.8 bushels the 1908-12 average. Estimated total production 744,000,000 bushels, compared with 760,904,000 bushels last year, 621,338,000 bushels in 1911, 635,121,000 bushels in 1910, and 663,000,000 bushels in 1909.

Oats—Area planted 28,541,000 acres, compared with 27,917,000 acres last year, 27,763,000 acres in 1911 and 32,588,000 acres in 1910. Condition 87.0 per cent of a normal, compared with 91.1 per cent last year and 86.4 per cent the ten-year average. Indicated yield 28.5 bushels per acre, compared with 27.4 bushels last year and 29.2 bushels the 1908-12 average. Estimated total production 1,104,000,000 bushels, compared with 1,104,000,000 bushels last year, 922,295,000 bushels in 1911, 1,196,841,000 bushels in 1910, and 1,007,000,000 in 1909.

Barley—Area planted 7,255,000 acres.

Saved From Operations

Two Women Tell How They Escaped the Surgeon's Knife by Taking Lydia E. Pinkham's Vegetable Compound.

Swarthmore, Penn. — "For fifteen years I suffered untold agony, and for one period of nearly two years I had hemorrhages and the doctors told me I would have to undergo an operation, but I began taking Lydia E. Pinkham's Vegetable Compound and am in good health now. I am all over the Change of Life and cannot praise your Vegetable Compound too highly. Every woman should take it at that time. I recommend it to both old and young for female troubles." — Mrs. EMILY SUMMERS, Swarthmore, Pa.

Baltimore, Md. — "My troubles began with the loss of a child, and I had hemorrhages for four months. The doctors said an operation was necessary, but I decided to try Lydia E. Pinkham's Vegetable Compound. The medicine has made me a well woman and I feel strong and do my own work." — Mrs. J. R. LAMMIE, 1200 Sargent St., Baltimore, Md.

Since we guarantee that all testimonials which we publish are genuine, it is not fair to suppose that if Lydia E. Pinkham's Vegetable Compound has the virtue to help these women it will help any other woman who is suffering in a like manner.

DIPLOMAS TODAY

AT A. & M. COLLEGE

FARMERS AND ENGINEERS TO BE GIVEN CERTIFICATES OF THEIR WORK.

P. L. DOWNS HEADS ALUMNI

C. M. Early of Waco is Given Medal as a Best Drilled Soldier—Corporation is Laid.

College Station, Tex., June 9.—Tuesday the Agricultural and Mechanical college of Texas will give diplomas to more than 120 men who will become builders, farmers and producers. The formal commencement exercises will be conducted at 10 o'clock when Judge Gordon Russell of Sherman, delivers the baccalaureate address to the graduates.

The exact number of graduates has not been determined. There were 141 in the senior class, but a very few have fallen by the wayside as the result of the final examinations.

Diplomas will be presented to the graduates by Col. E. B. Cushing of Houston, engineer in charge of construction for the Sunset Central lines and president of the board of directors of the college.

Musical numbers will be rendered by the college band and Glee club. Military exercises and drills and a competitive drill for the Howell flag will be another feature of the day.

The commencement exercises will close tomorrow night with the final ball when more than 500 couples will participate in the grand march at the new mess hall.

Intermittent showers put the crowd of visitors in a good humor today. The dust was laid and atmosphere cooled considerably.

A drill and inspection of the industrial department was the feature of this morning's festivities and this afternoon the corner stone of the new mess hall was laid.

Alumni Election.

At a meeting of the Alumni association the annual election of officers was conducted, resulting as follows: President, P. L. Downs, banker, Temple; first vice president, J. Webb Howell, Bryan; second vice president, C. O. Moser, Dallas; third vice president, R. G. Tabor, Houston; secretary, A. Mitchell, College Station; assistant secretary, R. B. Pearce, College Station; third member executive committee, A. C. Love, Franklin.

The annual banquet of the association was conducted tonight.

In the competitive individual drill this morning the following men were chosen as the best drilled:

Company A—N. A. Braumiller, Texarkana.

Company B—C. A. Searight, Austin.

Company C—M. Carlton.

Company D—W. R. Melton.

Company E—O. F. Washam.

Company F—W. C. Schmoorth, San Antonio.

Company G—D. R. Gallman.

Company H—M. Pentet.

Company I—E. O. Oglesby.

Company L—M. D. Cole.

Company K—C. M. Easley of Waco.

Company M—G. W. Mitchell.

Two United States army captains, J. M. Coward and W. E. Murray, of the Coast Artillery, now stationed at

Fort Crockett, Galveston, conducted the tests. They were high in their praise of the ability of the A. & M. cadets as young soldiers.

Dedication of Mess Hall.

The chief feature of the afternoon session was the laying of the corner stone of the new mess hall. This building, erected at a cost of more than \$100,000, will accommodate 1,500 students and with tables removed will seat more than 2,500. The exercises were conducted by Judge J. J. Mansfield of Columbus, most worshipful grand master of Texas Masons. He paid a tribute to Bernard Shiba, steward, in honor of whom the mess hall was named. Mr. Shiba has been at the head of the department of subsistence for 26 years and it was in appreciation of his services that the hall was named. Mr. Shiba was formerly owner of a big hotel in Galveston.

Using Indirect Methods.

"It is plain to me that sugar planters were seeking to influence the measure from whom they bought mules," said he. "Judging from these circumstances and others I believe there is a system growing up by which attempts are made to reach representatives or senators by indirect methods. It begins through business connections and finally they find some one in the district of a representative, and through him make an appeal to local citizens and have them send letters or telegrams appealing in behalf of the people of a state. As a matter of fact, it is not an appeal from the people. I do not think this has been confined to the tariff. I think a strong effort is being made here to affect the passage

SENATORS ON TRAIL OF LOBBY

Continued from Page 1

said, would be nothing more than "hypocritical affectation."

"I have never known any member of either body to be improperly influenced in legislation and have not known of any attempt on the part of anybody to exert improper influence."

Senator Reed said he had no personal connections affected by the tariff, did not know any lobbyist, had not been subjected to any attempts at influence and knew of no use of money improperly. He was certain, however, that a new system of attempting to influence legislation had risen in this country. He illustrated by telling the committee about telegrams from horse and mule dealers in St. Louis, saying: "Please vote for a duty on sugar; it is very necessary to preserve the mule industry of Missouri."

Report by States.

The condition of winter wheat and the acreage and the condition of spring wheat and oats by states follows:

Fort Crockett, Galveston, conducted the tests. They were high in their praise of the ability of the A. & M. cadets as young soldiers.

Dedication of Mess Hall.

The chief feature of the afternoon session was the laying of the corner stone of the new mess hall. This building, erected at a cost of more than \$100,000, will accommodate 1,500 students and with tables removed will seat more than 2,500. The exercises were conducted by Judge J. J. Mansfield of Columbus, most worshipful grand master of Texas Masons. He paid a tribute to Bernard Shiba, steward, in honor of whom the mess hall was named. Mr. Shiba has been at the head of the department of subsistence for 26 years and it was in appreciation of his services that the hall was named. Mr. Shiba was formerly owner of a big hotel in Galveston.

Using Indirect Methods.

"It is plain to me that sugar planters were seeking to influence the measure from whom they bought mules," said he. "Judging from these circumstances and others I believe there is a system growing up by which attempts are made to reach representatives or senators by indirect methods. It begins through business connections and finally they find some one in the district of a representative, and through him make an appeal to local citizens and have them send letters or telegrams appealing in behalf of the people of a state. As a matter of fact, it is not an appeal from the people. I do not think this has been confined to the tariff. I think a strong effort is being made here to affect the passage

of the tariff bill, or to effect a modification of it."

"How many senators of the seventy you have heard testify here, do you think have been improperly influenced?" asked Senator Nelson.

Senator Bankhead said he had served twenty-six years in congress, had heard of lobbies, but never saw one. He did not agree that running headquarters here to influence legislation was to be condemned. Senator Walsh said he was vitally interested in sugar and wool.

"I feel there is a lobby here and has been one all the time. A lobby is like a river—it flows all the time."

Senator Walsh added, however, that the lobby did not seem to him to be corrupt.

Farmers' Congress Program.

College Station, June 9.—Preparation for the Farmers' Congress, to be held at College Station July 28-29-30, was completed at a meeting of the executive committee here today. The program was adopted; President G. P. Knox of San Antonio was here and there was a full attendance of the committee.

Tungsten lamp filaments will last longer if a weak current be kept running through them, enough to keep them at a dull red.

San Antonio 1, Austin 0.

San Antonio, June 9.—San Antonio won a pitching duel between Browning and McCuller this afternoon, 1 to 0, when in the eighth Collins singled, went to second on an out and scored when Kibler got one through Thompson's legs. The play of the game came in the eighth with two down and Austin having two men on base. Thompson hit one sharply over the second bag with McIvor on second. Schwind leaped at the ball, falling on his side and spearing it with his gloved hand, rolling over and to his feet. All this was done in a flash. Thompson got a hit, but McIvor was held on third, though it was a hit and run play. Hollis popped up with his side and the full and Austin's last chance was gone.

Umpire—Mullaney.

Dallas 3, Galveston 2.

Galveston, June 9.—The wildness of Galveston pitchers today cost the Pirates the opening game of the series with the Dallas Giants 3 to 2. It was a tight contest on a muddy field with the locals putting up a classy uphill fight, but they were unable to get past the visitors, although they once tied the count on clean hitting. Dodd gave up five bases on balls and hit one better in little more than one inning and was succeeded by Roberts, who was also wild. Storch's home run in

the sixth inning accounted for the only earned run gained by the visitors.

xzHalgh hit for Brainerd in 9th.

xzLelidy hit for McCuller in 9th.

Summary: Two-base hits—Collins.

Stolen bases—McCuller, Schwind.

Roche. Sacrifice hits—Hille, Thompson.

James. Struck out—Browning 5,

McCuller 5. Bases on balls—Off

Browning 4, off McCuller 4. Left on

bases—San Antonio 7, Austin 10.

Double plays—Roche to Brainerd,

Brainerd (unassisted). Time—1:35.

Umpire—Mullaney.

Dallas 3, Galveston 2.

Galveston, June 9.—The wildness of Galveston pitchers today cost the Pirates the opening game of the series with the Dallas Giants 3 to 2. It was a tight contest on a muddy field with the locals putting up a classy uphill fight, but they were unable to get past the visitors, although they once tied the count on clean hitting. Dodd gave up five bases on balls and hit one better in little more than one inning and was succeeded by Roberts, who was also wild. Storch's home run in

the sixth inning accounted for the only earned run gained by the visitors.

COTTON MARKET

Prices Near New High Level
and Close Steady at Advance.

Continued Confidence of Speculators
Marked, but Generally Speculating,
Sunday Shows Speculation.

New York, June 9.—The cotton market showed renewed strength today with prices making new high ground for the movement and closing steady at a net advance of 5 to 10 points.

The opening was steady at a decline of 5 to 10 points in sympathy with low cotton futures, but the market closed immediately turned up on covering which caused it to be chiefly supported by increasing demand on the part of the market, owing to further shipments from the local stock. The relative demand here led to a further narrowing of the difference between New York and Liverpool and stabilizing long interests seemed to be selling considerable quantities. In some instances, however, the market was supported by purchases of August, while there was active covering of July by Wall Street and some scattered buying of old crop positions against sales of new crop deliveries.

Heavy cotton and cottonseed contracts were active and well supported, and active old crop contracts sold at 10 to 20 points higher during the early afternoon, while early new crop deliveries sold at 10 to 15 points above the old crop of last year.

There were scattered shipments of consecutive cotton from some sections of the western belt, but generally speaking the rates reported over the wire were characterized as beneficial, and private crop accounts were favorable to the extent that there had been no change in the crop situation here to help the advance. The foreign buying of new crop months, however, was said by some to be for spinning interest, and local bolls attributed the steady nature of the new deliveries to speculative short interest in some contracts for delivery were being held against trade requirements.

Private cables indicated that the market there had been sold off on unfavorable crop accounts and reduced to 10 to 20 points below the New York level, but the larger English spot sales may have contributed to the firmness of old crop positions here.

New Orleans, June 9.—The price of cotton was advanced today in the face of extremely favorable weather and crop news. Speculated buying and selling was active. Around the opening enough buying orders were received to cause the market to advance 10 to 15 points. The market was steady and the price was 5 to 10 points above the New York level. The price was 5 to 10 points above the New York level.

The cotton was very clean and the bolls were very full. The price was 5 to 10 points above the New York level. The price was 5 to 10 points above the New York level.

THE GRAIN MARKET

GOVERNMENT ESTIMATES HAVE
PROVED TO BE AS FIGURED IN
ADVANCE BY EXPERTS.

Firm Class of Wheat—Corn Up From
New—Only Minor Gain and
Provisions Vary.

Chicago, June 9.—Government estimates this afternoon regarding the 1913 crop of wheat proved to be almost exactly as figured out here in advance by experts. More interest was taken in a big decrease of the visible supply total. The result was a firm close at a net advance of 1/4 to 1/2 @ 1/4. Corn finished a sixteenth to 1/4 @ 1/4, and provisions varying from a shade decline to 1/4 increase.

Although wheat at the outset was under some selling pressure due to rains in Kansas, and suffered a temporary dip at midday on heavy primary receipts, the course of the market on the whole was upward. Developments concerning the visible supply tended to result in a continuous vigorous and in the end convinced the hope of even most sanguine friends of higher quotations. Stocks here were cut down to less than a third of the amount on hand a year ago. Speculation created a noticeable disposition to get away from the side of July wheat. In consequence, the spread widened out to be against the at the close Saturday. Rumors of fresh Balkan complications caused some buying and so, too, did the further curtailing of probable yields in Kansas and Oklahoma.

Corn rallied with wheat after an interval of weakness, the result of large receipts and favorable weather. The volume of all trading was small.

Despite buying sales by cash houses, some climbed on account of well grounded fears that the government crop report would show a lower condition than had been predicted. Wheat market fluctuations dominated the previous day. As usual of late port showed the greatest relative strength.

Provisions, cables indicated that the market there had been sold off on unfavorable crop accounts and reduced to 10 to 20 points below the New York level, but the larger English spot sales may have contributed to the firmness of old crop positions here.

New Orleans, June 9.—The price of cotton was advanced today in the face of extremely favorable weather and crop news. Speculated buying and selling was active. STOCK MARKET

PRINCIPAL SECURITIES UNDER
PRESSURE AND MOVEMENT
IS DOWNWARD.

Foreign Heaviness Has an Effect on
This Side and Traders Make no
Effort to Mark Up Prices.

New York, June 9.—The principal securities markets of the world were again under pressure today and the movement of stocks here was sharply downward. Union Pacific, St. Paul, and nearly twenty other stocks of other description reached new low levels for the decline, and while some of the important shares remained above their previous bottom figures, there were substantial losses in all quarters. Foreign markets were disturbed by the prospect of renewed hostilities in the Balkans, and some uneasiness was felt in London regarding the approaching fortnight settlement. Under these circumstances further European selling here was regarded as natural. London disposed of perhaps 20,000 shares here on balance, and there was some selling here on direct orders from the continent.

Pressure from abroad was an important factor in the stock market's movement. Traders showed no desire to attempt to mark up prices here in the face of heaviness abroad, especially in view of the fact that should they succeed they would merely be loading on added inducements for further liquidation of European holdings of American stocks. Professional operators took advantage of the situation to sell stocks. They were helped by further liquidation of both the standard investment issues and low priced shares. Although the list was depressed throughout the day pressure was not as severe as on some recent days of heavy liquidation and the market showed less evidence of nervousness.

Although the decrease of more than 1,000,000 pounds in surplus copper stocks shown in the May statement was regarded as favorable, it fails to come up to expectations of the trade which had looked for a somewhat larger reduction. The metal stocks were especially weak today, the copper shares declining with the steel group, but the monthly statement had little effect on quotations.

Bonds were weak. Total sales, par value, \$1,500,000. United States bonds unchanged on call.

LIVESTOCK.
Port Worth, June 9.—Although receipts for Monday were moderately liberal, the supply was really short of the demand and where the market displayed any change it was toward a slightly higher level. Beef steers were steady to strong and on stocker saws trade displayed a little color. Cows, heifers and bulls sold on a steady basis. Stocker cows, heifers and calves were active and steady. Veal calves established a new high notch for those yards, bringing 12.50. The market was steady.

Hogs were steady to a nickel lower. Sheep were quoted unchanged from last week's close.

Receipts amounted to 4,000 cattle, 1,000 calves, 1,000 hogs and 1,000 sheep.

Chicago, June 9.—Receipts—Receipts 5,000; market strong; bulk \$14.00 @ 14.50, heavy \$13.50 @ 14.00, packers and butchers \$14.00 @ 14.50, light \$13.50 @ 14.00, pigs \$13.00 @ 13.50.

AMONG WHOLESALE

GROUP STILL LOOK WELL AND
GOOD RAIN ASSURES THE
YIELD.

Apples Are Off the Market, but
Peaches and Watermelons
Coming.

Yesterday was not "Blue Monday" by any means among the wholesalers of Waco, though all expressed regret that "it missed such a good chance to rain."

Crops, however, are not as yet affected to any serious extent. Along the Katy between Waco and Hillsboro both corn and cotton look well. Rain will soon be needed, nevertheless, and that heavy. Produce dealers are getting good supplies of everything in season. Nice Rocky Ford cantaloupes are coming in plentifully and selling at \$2.00 per crate. A carload of Texas watermelons received Saturday morning were about all sold yesterday evening; they brought 30 per pound. Best Texas tomatoes of fine quality are coming in steadily and are offered at reasonable prices. European selling here was regarded as natural. London disposed of perhaps 20,000 shares here on balance, and there was some selling here on direct orders from the continent.

Pressure from abroad was an important factor in the stock market's movement. Traders showed no desire to attempt to mark up prices here in the face of heaviness abroad, especially in view of the fact that should they succeed they would merely be loading on added inducements for further liquidation of European holdings of American stocks.

Professional operators took advantage of the situation to sell stocks. They were helped by further liquidation of both the standard investment issues and low priced shares. Although the list was depressed throughout the day pressure was not as severe as on some recent days of heavy liquidation and the market showed less evidence of nervousness.

Although the decrease of more than 1,000,000 pounds in surplus copper stocks shown in the May statement was regarded as favorable, it fails to come up to expectations of the trade which had looked for a somewhat larger reduction. The metal stocks were especially weak today, the copper shares declining with the steel group, but the monthly statement had little effect on quotations.

Bonds were weak. Total sales, par value, \$1,500,000. United States bonds unchanged on call.

LIVESTOCK.
Port Worth, June 9.—Although receipts for Monday were moderately liberal, the supply was really short of the demand and where the market displayed any change it was toward a slightly higher level. Beef steers were steady to strong and on stocker saws trade displayed a little color. Cows, heifers and bulls sold on a steady basis. Stocker cows, heifers and calves were active and steady. Veal calves established a new high notch for those yards, bringing 12.50. The market was steady.

Hogs were steady to a nickel lower. Sheep were quoted unchanged from last week's close.

Receipts amounted to 4,000 cattle, 1,000 calves, 1,000 hogs and 1,000 sheep.

Chicago, June 9.—Receipts—Receipts 5,000; market strong; bulk \$14.00 @ 14.50, heavy \$13.50 @ 14.00, packers and butchers \$14.00 @ 14.50, light \$13.50 @ 14.00, pigs \$13.00 @ 13.50.

Cattle—Receipts 5,000, including 100 head \$1
